

12" Network Cabinet / Control Cabinet with removable Front Cover 6U black

Description

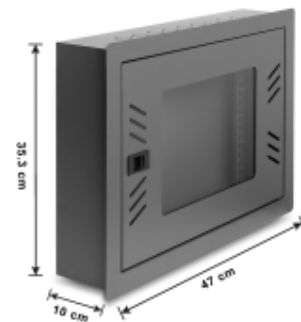

This network cabinet by Delock can be used for wall mounting and is ideal for the installation of 12" devices. With a height of 6 rack units (6U), it offers space for small to medium-sized network installations and is ideal for use in offices, residential buildings, workshops, and equipment rooms.

Removable front panel with viewing window

The front panel allows quick and easy access to the installed network components. Due to the integrated snap-lock mechanism, the front panel can be easily opened or completely removed if necessary. This makes installation, maintenance and upgrades much easier. The viewing window provides a clear view of the interior of the network cabinet at all times.

Optimised ventilation and cable management

The side ventilation slots promote air circulation inside the cabinet and help to dissipate heat. Several cable entries at the top and bottom also allow for neat and flexible routing of network and power cables.

Item no. 43424

EAN: 4043619434244

Country of origin: China

Package: Box

Technical details

- 12" network cabinet for wall mounting, 6U
- 2 profile rails on the front
- Removable front panel with viewing window
