Delock DisplayPort 1.4 KVM Switch 8K 30 Hz with USB 3.0 and Audio

Description

This KVM switch by Delock is a convenient solution for connecting **four computers** with DisplayPort output **to one DisplayPort monitor**.
Additionally there is an HDMI output for connection of two monitors, of which only one can be active at a time.

Peripheral devices
Furthermore, two USB 2.0 ports for a mouse and keyboard, and **two USB 3.0 ports** for a hard drive or USB memory can be connected.

Flexible Control
The active computer can be selected by mouse gesture, keyboard hotkey, button on the device or infrared remote control.

Multi-Stream Transport (MST)
With the support of MST (Multi-Stream Transport), **multiple monitors** can be used at the DisplayPort output **with an optional MST hub**.

Note

KVMs emulate a standard wired 104 key keyboard and wired generic 2 or 3 button scroll wheel mouse on their respective console ports. Whether or not a wireless or gaming mouse and keyboard work with KVM switches depends on several factors; in general, most wireless mice and keyboards do not support working with KVM switches. We recommend to use a standard wired mouse and keyboard with our KVM switches.
