

# USB 10 Gbps Hub with 2 USB Type-C™ and 2 USB Type-A Ports

## Description

This solid USB hub by Delock with **metal housing** can be connected to a computer, laptop or mobile device via the USB Type-A or USB-C™ interface. It expands the computer by **four USB ports**. Different USB devices such as USB flash memory, card reader, external enclosure etc. can be connected. A maximum **data transfer rate of up to 10 Gbps** can be reached.

### Extensive connectivity

Due to the specially designed adapter, the Delock hub can be quickly and easily connected to the USB Type-A socket. Thus, it can be easily connected to new devices with USB Type-C™ female and older devices that only have a USB Type-A connector. The adapter is located directly on the cable and therefore it cannot be lost.

### Inclined design

Due to the **specially adapted inclination**, the hub is ideal for the home or office desk. This makes it easy to plug in USB devices.

### Secure stand

The **rubber pads** on the bottom prevent the hub from slipping when, e.g. a USB stick or USB cable is plugged in.

### Small, stable and handy

Due to its **small dimensions and its sturdy housing**, this Delock hub is particularly suitable for travelling. It can simply be packed into the bag together with the laptop or tablet and used as needed.

### Additional USB Type-C™ connector for power supply

If the power supply of the host device is insufficient, a separate power supply can be connected to the additional USB-C™ female. Charging of the host device is not possible.
