

# M12 Cable X-coded 8 pin male straight to RJ45 plug angled upwards S/FTP shielded 1 m orange

## Description

This industrial Ethernet cable by Delock can be used to connect various components with M12 connectors, e.g. for machine control or automation.

### Angled upwards

The RJ45 connector is angled at 90° upwards, allowing the cable to exit vertically from the port. This design is ideal for space constrained environments, such as control cabinets or enclosures, and helps prevent unnecessary bending of the cable enabling a space saving and cable friendly installation.
