Active Optical Cable USB 10 Gbps USB Type-C™ male to male angled 7.5 m

Description

This active optical cable by Delock enables data transfer at up to 10 Gbps and stable performance over long distances. With its angled USB-C™ connector, it ensures a secure and space-saving connection that is particularly suitable for cameras, laptops, or VR devices.

Active Optical Cable

This active optical cable uses optical fiber to transmit high-speed signals. Compared to traditional copper cable, it is softer, thinner, lighter, and can transmit signals over longer distances without loss.

Please Note

DisplayPort Alternate Mode (DP Alt Mode) is not supported, so no video signals are transmitted and no monitors can be connected.
