

TOSLINK Cable mini TOSLINK 3.5 mm male to TOSLINK female, Ø 2.2 mm, 2 m, black

Description

This high-quality mini TOSLINK cable by Delock allows devices with a 3.5 mm optical output to be easily connected to standard TOSLINK interfaces. The optical audio cable is ideal for digital audio transmission between laptops, sound cards, game consoles, portable media players, as well as TVs, soundbars, and AV receivers.

Lossless signal transmission

Signal transmission is entirely optical via fiber-optic technology. This makes the cable immune to electromagnetic interference and ensures stable, low-loss transmission of digital audio signals in SPDIF format. The result is clear and unadulterated sound reproduction without interference.

The perfect balance of flexibility and stability

With a cable diameter of 2.2 mm, this optical audio cable offers the perfect balance between flexibility and durability. It is easy to install and is suitable for use in both home theater and professional audio systems.

Item no. 90920

EAN: 4043619909209

Country of origin: China

Package: Zip poly bag
